**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, "HS2" and "HI2" lack antecedent basis.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 4, 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by de Pous et al. (6,799,690). De Pous et al. disclose, in figs.1 and 2, a fluid dispenser member comprising a body 21 defining a chamber; an actuator rod 22; a periphery bearing collar 106, a neck gasket 3; the axial height between the bottom face of the

collar and the top end of the rod is substantially equal to the axial height between the bottom face of the collar and the bottom end of the body.

5. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by de Schultz (6,170,713). Schultz discloses, in fig. 1, a fluid dispenser member comprising a body 3 defining a chamber; an actuator rod 8; a periphery bearing collar 7, a neck gasket 16; the axial height between the bottom face of the gasket and the top end of the rod is substantially equal to the axial height between the bottom face of the gasket and the bottom end of the body.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3, 5-8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Pous et al.. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the height and diameter of claimed components of the fluid dispenser member of de Pous et al. as claimed, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering of the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
